

CURRICULUM VITAE

University of Idaho

NAME: Matthew R. Falcy

DATE: September 25, 2026

RANK OR TITLE: Associate Professor of Biometrics

DEPARTMENT: Fish and Wildlife Sciences

OFFICE LOCATION AND CAMPUS ZIP:

105A, College of Natural Resources
875 Perimeter Dr., Moscow, ID. 83844

EMAIL: mfalcy@uidaho.edu

WEB: <https://www.uidaho.edu/people/mfalcy>

DATE OF FIRST EMPLOYMENT AT UI: March 1, 2021

DATE OF TENURE: NA

DATE OF PRESENT RANK OR TITLE: 2026

EDUCATION:

2011. Ph.D. Ecology and Evolutionary Biology, minor in Statistics. Iowa State University. Ames, IA.
2005. M.S. Forest Science. Universidad de Chile. Santiago, Chile.
2002. M.E.M. Environmental Management. Portland State University. Portland, OR.
1997. B.S. Biological Sciences. University of California. Davis, CA.

EXPERIENCE:

Teaching, Extension and Research Appointments:

2026- Present: Associate Professor of Biometrics. University of Idaho. Moscow, ID.
2021-2026: Assistant Professor of Biometrics. University of Idaho. Moscow, ID.
2021- Present: Assistant Unit Leader. USGS, Idaho Cooperative Fish and Wildlife Research Unit. Moscow, ID.
2009-2010: Instructor of Evolution. Oregon State University. Corvallis, OR.
2008: Instructor of Cell Biology. Mt. Hood Community College. Gresham, OR.
2003-2005: Fellow. Organization of American States. Santiago, Chile.

Non-Academic Employment:

2010-2021: Quantitative Fish Biologist. Oregon Department of Fish and Wildlife.

1) Deliver scientific and technical support to implement conservation and fishery management goals.

- Served on leadership team that developed Coastal Multispecies Conservation Plan.
- Assembled data, developed appropriate models, and reported metrics of population health for the Rogue Fall Chinook Conservation Plan and the Coastal Multispecies Conservation Plan, and Coastal Coho Recovery Plan, and the Rogue and South Coast Multispecies Plan.
- Answered questions from staff, stakeholders, and technical reviewers about conservation plan analyses.
- Modeled abundance metrics needed to implement coastal coho fishery.
- Developed methods to calculate the proportion of hatchery fish spawning naturally.

2) Represent agency and communicate science to diverse audiences.

- Member of the Hatchery Scientific Review Group, established by the U.S. Congress.
- Taught workshops and delivered presentations at professional societies and academic institutions
- Published ideas and original research in prestigious international journals and subject-specific journals.
- Provided peer review to authors submitting articles to leading academic journals.
- Spoke at international and local professional society meetings, university, etc.

3) Create complex mathematical, statistical, and ecological simulation models to answer natural resource management questions.

- Developed hierarchical, state-space Bayesian statistical stock-recruitment models to estimate magnitude of uncertainty in estimates of fish population trend, productivity, carrying capacity, and abundance-habitat relationships.
 - Programmed numerous population viability models that use Bayesian estimates of uncertainty.
 - Developed novel model to synthesize the genetic and demographic interactions of hatchery and wild fish.
 - Conducted analyses to determine effects of harvest on population viability.
 - Developed salmon forecasting techniques using artificial intelligence.
 - Added a time domain to existing spatial mark-recapture models to model habitat use.
- 4) Develop decision support tools.
- Created Bayesian belief network models to capture the structure of decisions about research priorities, tide gates restoration, cold water refugia, and hatchery practices.
 - Developed rule-set guiding the harvest bag limits of coastal fall Chinook.
 - Optimized effort across multi-objective monitoring using calculus and stochastic dynamic programming.
 - Created geospatial tool for designing biological reserves on stream networks for statewide habitat prioritization.
- 5) Provide statistical consulting for staff at ODFW.
- Implemented regression, ANOVA, BACI, generalized linear models, mixed effects models, hierarchical models, meta-analysis, generalized additive models, variograms, kriging, conditional autoregressive spatial analysis, time series analysis, state-space models, PCA, MANOVA, ordination, regression trees, neural networks, LASSO and other shrinkage techniques, model selection with AIC, BIC, WAIC, DIC, Bayes factors, likelihood ratios.
 - Frequently addressed questions from staff about power analysis, mark-recapture analysis, monitoring designs, spatially-explicit analyses, analysis of existing data.
 - Provided review and recommendations for economic/budget analyses for executive administrators.

1998-2000: Volunteer. US Peace Corps, Nicaragua.

- Developed environmental education curricula for Parque Nacional Volcán Masaya.
- Taught English as a second language in the community of Nindirí, Nicaragua.
- Formally scored the highest rate of Spanish improvement during 2 years among my cohort of 20 volunteers.

Honors and Awards:

- *Team Pride Award*, Oregon Department of Fish and Wildlife, 2014. Out of ~1000 FTEs.
- *Award of Excellence*, Oregon Department of Fish and Wildlife, 2015. Out of ~ 600 FTEs.
- *Individual Pride Award*, Oregon Department of Fish and Wildlife, 2016. Out of ~ 1000 FTEs.

TEACHING ACCOMPLISHMENTS:

Areas of Specialization: Population Ecology, Statistics, Decision Analysis.

Courses Taught

- Ecological Modeling. University of Idaho. WLF 552. Fall 2021, Fall 2023.
- Bayesian Analysis in Ecology. University of Idaho. WLF 558. Spring 2023, Spring 2025.
- Evolution. Oregon State University. BI445/545. Winter 2009, Spring 2010.
- Cell Biology. Mt. Hood Community College. BI101. Fall 2008.

Students Advised:

Graduate students:

- Ryan Vosbigian. M.S. Fisheries Resources. Graduated Summer 2024. Now *Fisheries Biometrician* at Quinault Indian Nation.
- Briana Lubenau. M.S. Wildlife Resources. Co-advised. Graduated Fall 2024. Now *Biologist* at USFWS.
- Joshua Heishman. M.S. Fisheries Resources. Graduated Spring 2025. Now *Stock Assessment Biologist* at Upper Skagit Indian Tribe.

- Samuel Foster. Ph.D. Wildlife Resources. Graduated Spring 2025. Now *Wildlife Biologist* for Ministry in British Columbia.
- Cameron Macias. Ph.D. Wildlife Resources. Co-advised. Graduated Summer 2025. Now *Wildlife Biologist* for Lower Elwha Klallam Tribe.
- Nathan Nadal. M.S. Fisheries Resources. In progress.
- Manuel Carballo. M.S. Fisheries Resources. In progress.
- Jacob Russell. Ph.D. Environmental Sciences. Co-advised. In progress.

Post-doctoral scholars

- Sarah Bassing. Spring 2025. Now *Assistant Professor*, Montana State University.

Paid internships supervised

- Tamsen Farris. Summer 2025-Spring 2026. Undergraduate in Modeling and Data Science working on steelhead ocean survival.
- Logan Wendling. Summer 2021. M.S. Statistics. Now *Fisheries Biometrician*, Alaska Department of Fish and Game.
- Jacob Hofer. Summer 2024. M.S. Statistics. Now *Statistician I*, Northrop Grumman Aeronautics.
- Jo Ash. Summer 2024 – present. Graduate of MNR program.

Service on graduate committees

- Donovan Maude. M.S. Fisheries Resources. Spring 2024.
- Megan Wright/Turnock. M.S. Wildlife Resources. Spring 2024.
- Katrina Lopez. M.S. Wildlife Resources. Spring 2024.
- Katie Huggler. Ph.D. Wildlife Resources. Spring 2024.
- Lilian Harrison. M.S. Wildlife Resources. Fall 2024.
- Nick Voss. Ph.D. Fisheries Resources. Summer 2025.
- Julia Rushton. M.S. Agriculture. Summer 2025.
- Ariana Cerreta. Ph.D. Wildlife Resources. Spring 2026.
- Brent Barry. Ph.D. Wildlife Resources. In progress.
- Garrison Ferone. Ph.D. Wildlife Resources. In progress.
- Fiona McKibben. Ph.D. Wildlife Resources. In progress.
- David Arthaud. Ph.D. Fisheries Resources. Inactive.

Courses Developed:

- Ecological Modeling. University of Idaho. WLF 5520.
- Bayesian Analysis in Ecology. University of Idaho. WLF 5580.
- Evolution. Oregon State University. BI445/545.

Non-credit Classes, Workshops, Seminars, Invited Lectures, etc.:

- Falcy, M.R.** 2026. The Ecology of Uncertainty: Models, Decisions, and Management. Invited seminar. University of Washington.
- Falcy, M.R.** 2026. The Ecology of Uncertainty: Models, Decisions, and Management. Invited seminar. Department of Fish and Wildlife Sciences, University of Idaho.
- Falcy, M.R.** 2026. Tools for career success in a changing hiring landscape. Workshop at the Annual Meeting of the Idaho Chapter of the American Fisheries Society.
- Falcy, M.R.** 2026. Decision Making in Fish and Wildlife Management. Guest lecture in FISH5100 – Advanced Fish and Wildlife Management. University of Idaho.
- Falcy, M.R.** 2025. Applications of Quantitative Analysis in Ecology. Invited seminar, University of Northern British Columbia.
- Falcy, M.R.** 2025. Analytical Ecology. Invited seminar. Department of Fish and Wildlife Sciences, University of Idaho.
- Falcy, M.R.** 2025. Paradigms of statistical inference. Guest lecture in WLF 550- Quantitative Analysis of Fish and Wildlife Populations. University of Idaho.

- Falcy, M.R.** 2024. Ecological Application of Statistical Theory. Invited seminar. Department of Mathematics and Statistics, University of Idaho.
- Falcy, M.R.** 2024. Analytical Ecology. Invited seminar. Department of Mathematics and Statistical Science, University of Idaho.
- Falcy, M.R.** 2024. Decision Making in Fish and Wildlife Management. Guest lecture in FISH510 – Advanced Fish and Wildlife Management. University of Idaho.
- Falcy, M.R.** 2024. Introduction to Bayesian Analysis. 8-hour workshop at the annual meeting of the Idaho Chapter of the Wildlife Society. Coeur d’Alene, ID.
- Falcy, M.R.** and Scheuerell, M. 2024. Salmon Forecasting Workshop. Annual meeting of the American Fishery Society of ID, WA, BC. Spokane, WA.
- Peterson, J., **Falcy, M.R.**, Scheuerell, M., and Som, N. 2024. Cooperative Fish and Wildlife Research Units Cooperator Run Forecasting Workshop. 16-hour event hosted by US Geological Survey. Wilsonville, OR.
- Falcy, M.R.** 2023. Paradigms of statistical inference. Guest lecture in WLF 550- Quantitative Analysis of Fish and Wildlife Populations. University of Idaho.
- Falcy, M.R.** 2023. Theory and practice of scientific decision-making. Guest lecture in WLF 492 – Wildlife Management.
- Falcy, M.R.** 2022. Scientific decision-making. Guest lecture in WLF 492 – Wildlife Management.
- Falcy, M.R.** 2022. Decision Making in Fish and Wildlife Management. Guest lecture in FISH510 – Advanced Fish and Wildlife Management. University of Idaho.
- Falcy, M.R.** 2021. Paradigms of statistical inference. Guest lecture in WLF 550- Quantitative Analysis of Fish and Wildlife Populations. University of Idaho.
- Falcy, M.R.** 2019. SNO BiRD: Stream network optimizer for biological reserve design. Invited seminar. Fisheries Department, Oregon State University. Corvallis, OR.
- Falcy, M.R.** 2019. BioRogy. Four-week review of R programming and statistical inference for Oregon Department of Fish and Wildlife professionals.
- Falcy, M.R.** 2018. Effects of sea lions on Willamette River winter steelhead viability. Invited seminar. Fisheries Department, Oregon State University. Corvallis, OR.
- Falcy, M.R.** 2018. Quantitative and Computational Ecology. 8-hour seminar in the Department of Fisheries and Wildlife, Oregon State University. Corvallis, OR.
- Falcy, M.R.** 2017. Conservation decision making: Integrating the precautionary principle with uncertainty. Invited seminar. Fisheries Department, Oregon State University. Corvallis, OR.
- Falcy, M.R.** 2017. Bayesian Analysis for Beginners. 2-day workshop at the annual meeting of the Oregon Chapter of the American Fisheries Society. Bend, OR.

SCHOLARSHIP ACCOMPLISHMENTS:

Peer Reviewed Papers

* = advisee. Papers listed as “in prep” have been fully written but are undergoing refinement prior to submission.

- Vosbigian*, R. A., M. Dobos, and M.R. **Falcy**. 2026. An age- and time-specific space-for-time mark-recapture model. Target journal: *Methods in Ecology and Evolution* (In prep).
- Heishman*, J., S. Wilson, A. Black, N. Jensen, and M.R. **Falcy**. 2026. Beyond put and take: A quantitative framework for population-level decision-making. Target journal: *Fisheries* (In prep).
- Vosbigian*, R., D.W. Whitney, J.M. DuPont, and M.R. **Falcy**. 2026. Evaluating the influence of bag and size limits on harvest of steelhead. Target journal: *North American Journal of Fisheries Management* (In prep).
- Macias*, C.L., M.R. **Falcy**, T. Levi, L.M. Elbroch, K.A. Sager-Fradkin, and L.P. Waits. 2026. Prey composition and dietary overlap of bobcats and cougars using GPS collar data and DNA metabarcoding in western Washington State. Target journal: *Environmental DNA* (In prep).
- Macias*, C.L., M.R. **Falcy**, B.C. Augustine, J.R. Adams, S. Cendejas-Zarelli, S.H. Williams, L.M. Elbroch, K.A. Sager-Fradkin, and L.P. Waits. 2026. Evaluating new abundance estimators in real-world applications. Target journal: *Journal of Wildlife Management* (In prep).
- Macias*, C.L., M.R. **Falcy**, J.R. Adams, L.M. Elbroch, K.A. Sager-Fradkin, and L.P. Waits. 2026. Evaluating fecal DNA preservation and extraction methods for noninvasive wildlife genetic sampling. Target journal: *Conservation Genetics Resources* (In prep).

- Foster*, S., A. Ford, and M.R. **Falcy**. 2026. Community reordering along disturbance gradients: Roads filter mammal composition. Target journal: Canadian Journal of Zoology (In prep).
- Foster*, S., A. Ford, and M.R. **Falcy**. 2026. Seasonal and bottom-up processes drive weekly habitat use of mule deer more than perceived predation risks. Target journal: Journal of Wildlife Management (In prep).
- Foster*, S., A. Ford, and M.R. **Falcy**. 2026. Caught in a time trap: Animal activity in the Anthropocene. Target journal: Frontiers in Ecology and the Environment (In prep).
- Harrison, L.A., K.S. Christie, J.L. Rachlow, and M.R. **Falcy**. 2026. Pika behavioral response to climate during the summer foraging season at high latitudes. Target journal: Journal of Mammalogy (In prep).
- Ash, J., C. Caudill, and M.R. **Falcy**. 2026. The evolution of philopatry on spatially structured and temporally trending landscapes. Target journal: Ecography (In prep).
- Farris*, T., R.A. Vosbigian*, T. Copeland, M. Dobos, and M.R. **Falcy**. 2026. Snake River steelhead ocean survival driven by early ocean conditions and smolt size. (In prep).
- Russell*, J., R.A. Vosbigian*, and M.R. **Falcy**. 2026. Misinformed by non-informative priors: Jeffreys' method ensures consistent Bayesian inference. Ecology (In review).
- Falcy**, M.R. 2026. Data-driven decision-making with novel probability density functions. Methods in Ecology and Evolution (In review).
- Falcy**, M.R., and C.M. Lorion. 2026. Decision-making processes. In *Inland Fisheries Management in North America*, 4th ed. (In review).
- Heishman*, J., A. Black, S. Wilson, and M.R. **Falcy**. 2026. An open-population demographic analysis of burbot in the Kootenai River to inform fishery management. Transactions of the American Fisheries Society (In review).
- Mumma, M., E. Roche, Z. Fogel, J. Tebbenkamp, J. Struthers, M. Parsons, K. Oelrich, M. Campbell, M.R. **Falcy**, and S. Roberts. 2026. Estimating gray wolf (*Canis lupus*) abundance using close-kin data and approximate Bayesian computation. Ecological Applications (In review).
- Sabal, M.C., E. Leonetti, M.R. **Falcy**, P. Stevens, J. Anthony, and C. Lorion. 2026. Forecasting spring Chinook salmon abundances amid a changing climate on the Umpqua River, Oregon. Canadian Journal of Fisheries and Aquatic Sciences (In revision).

- Vosbigian*, R., J.H. Powell, and M.R. **Falcy**. 2024. Integrating data on the Snake River steelhead fishery enhances reporting of protected natural-origin stocks. Joint Meeting of the Washington-British Columbia and Idaho Chapters of the American Fisheries Society. Spokane, WA.
- Heishman*, J., A. Black, S. Wilson, and M.R. **Falcy**. 2024. Abundance and density dependent survival of burbot in the Kootenai River's hatchery-augmented fishery. Joint Meeting of the Washington-British Columbia and Idaho Chapters of the American Fisheries Society. Spokane, WA.
- Lubenau*, B.M., D.E. Ausband, M.R. **Falcy**, et al. 2024. New boot scootin': The migratory plasticity of southern mountain caribou. Annual Meeting of the Idaho Chapter of The Wildlife Society. Coeur d'Alene, ID. Also presented at U.S. Fish and Wildlife Service Science of the Service, Idaho.
- Bassing*, S.B., D.E. Ausband, M.A. Mumma, M.A. Hurley, S. Thompson, and M.R. **Falcy**. 2024. Predator co-occurrence affected by prey and habitat more than competitor presence at multiple time scales. Annual Meeting of the Idaho Chapter of The Wildlife Society. Coeur d'Alene, ID.
- Heishman*, J., and M.R. **Falcy**. 2023. Age-structured survival rates of burbot in the Kootenai River's hatchery-augmented fishery. Annual Meeting of the Idaho Chapter of the American Fisheries Society. Boise, ID.
- Vosbigian*, R., L. Wendling*, T. Copeland, and M.R. **Falcy**. 2023. Two-year cycles in Snake River steelhead growth suggest competition with pink salmon in the Pacific Ocean. Annual Meeting of the Idaho Chapter of the American Fisheries Society. Boise, ID.
- Winkel, B., D.E. Ausband, M.R. **Falcy**, et al. 2023. Migratory patterns and plasticity of southern mountain caribou in a changing landscape. North American Caribou Workshop and Arctic Ungulate Conference. Anchorage, AK.
- Bassing*, S.B., D.E. Ausband, M.A. Mumma, and M.R. **Falcy**. 2023. Spatial patterns of predator interactions in northern Idaho: Preliminary findings. Annual Conference of the Idaho Chapter of The Wildlife Society. Boise, ID.

Grants and Contracts Awarded: (provide principal and co investigators, title, sponsor, funding dates, amount)

- Ausband, D.A., and M.R. **Falcy** (Co-PI). Caribou Recovery in Northern Idaho. US Fish and Wildlife Service. August 2021- May 2025. \$330,000.
- Falcy, M.R.** Snake River Steelhead Run Reconstruction. Idaho Department of Fish and Game. May 2022-August 2024. \$104,000
- Falcy, M.R.** Burbot Population Dynamics in Kootenai River. Idaho Department of Fish and Game. August

2022- May 2025. \$100,723

Falcy, M.R. and Ausband, D. (Co-PI). Patterns and Processes in Multi-predator Dynamical Systems. Idaho Department of Fish and Game. August 2023-December 2024. \$180,283.

Falcy, M.R. British Columbia Mule Deer Habitat and Communities. MITACS Accelerate. \$60,609

Falcy, M.R. Mammal Predator Occurrence Patterns in British Columbia. HCTF. \$10,000

Falcy, M.R. Ecotoxicological Inference in the Kootenai River, Idaho. Kootenai Tribe of Idaho. August 2024-May 2026. \$150,950.

Falcy, M.R. Mountain Whitefish Diet Analysis. Kootenai Tribe of Idaho. August 2024-May 2026. \$140,484.

Link, T. and M.R. Falcy (Co-PI). Linking Dynamic Microclimatic Refugia to Habitat Use Strategies. USGS, NW Climate Adaptation Science Center. October 2024 – December 2027. \$329,597.

SERVICE:

Committee Assignments:

- Scholarship Committee. Department of Fish and Wildlife Sciences. 2022-present
- Internship Committee. Department of Fish and Wildlife Sciences. 2022-present

Professional and Scholarly Organizations

- Member: American Fisheries Society
- Member: The Wildlife Society

Outreach Service:

- As a federal (US Geological Survey) employee, I am discouraged from speaking with the press.

Community Service: (non-academic unrelated to employment)

- Led learning activity for 12-16 year-olds about the role of math in fish and wildlife management at the University of Idaho's Natural Resources Camp. Ketchum Idaho. June 2024.

PROFESSIONAL DEVELOPMENT:

Administration/Management:

Foundations of Leadership. 56-hour course offered by the State of Oregon.
